Problem Specification

Sort Three

1   PROBLEM DESCRIPTION

Write a method that accepts three doubles and prints the digits in ascending order.

2   OUTPUT DESCRIPTION

Your program should write a line for each call to the method similar to:

```
The parameters are 2.7 3.1 and 42.0
```

3   WHAT TO TURN IN

- Your code
- Documented test cases. Your main method may make multiple calls to your method.
