Problem Specification

Min Max

1   PROBLEM DESCRIPTION

Write a method that accepts two integers and determines which is the minimum value and which is the maximum value.

2   OUTPUT DESCRIPTION

Your program should write a line for each call to the method similar to:

```
7 is the minimum value, 42 is the maximum value
```

3   WHAT TO TURN IN

- Your code
- Documented test cases. Your main method may make multiple calls to your method.
