Problem Specification

First Try, First Catch

1   PROBLEM DESCRIPTION

Modify the file *FileExceptions.java* provided on the class website. If the file *notThere.txt* is not present, the code will throw an exception. Prevent this exception from being thrown.

2   OUTPUT DESCRIPTION

If the file *notThere.txt* is not present in the working directory, print your own error message to the console.

3   WHAT TO TURN IN

- Your modified *FileExceptions.java* file
- Documented test cases
