Problem Specification

Simply Numbers

1 PROBLEM DESCRIPTION

Use the *SimplyNumbers01.java* file provided on the course website. Compile and run the code. Use the output to answer the questions below.

2 WHAT TO TURN IN

- A screenshot of the output in the console
- Answer the questions below

3 QUESTIONS

- What happens when you run the code? What value do you get? If you got a weird value (negative) for your answer, what do you think went wrong? *hint: _____ compliment.

- What are the min and max values for Java's byte data type?
    - Google is your friend! It will be handy for you to keep in the back of your mind the value bounds for different data types; don't always need to remember, but good to know!
