PROGRAM SPECIFICATION

Design a Course Class

1 PROGRAM DESCRIPTION

Design and implement a class that represents a college course (not a particular offering of a course, just the course in general). Include attributes, methods, and constructors appropriate for the object you are representing.

2 INPUT DESCRIPTION

Create a driver class that instantiates 3 different instances of the course object.

3 OUTPUT DESCRIPTION

Print an appropriate summary of each course to the console.

4 WHAT TO TURN IN

- Your code
- A copy of the console output
