Program Specification

Coin Flip

1 PROGRAM DESCRIPTION

Write a program that simulates flipping a coin. Prompt the user to call the value before revealing it.

2 INPUT DESCRIPTION

The user shall enter either **'heads'** or **'tails'** when prompted in the console. The program should be insensitive to the case of the string the user enters.

3 OUTPUT DESCRIPTION

The program should print a paragraph similar to:

You chose heads
The coin landed on heads
You win!

4 WHAT TO TURN IN

- Your code
- Documented test cases
